

TASER® CAM™

Only TASER® Electronic Control Devices (ECDs) are deployed more than 40 countries worldwide and more than 400,000 law enforcement officers in more than 14,000 law enforcement agencies around the globe carry a TASER device. For more than 10 years, the general safety and effectiveness of these devices have been affirmed by the governments of the United Kingdom, the United States, Canada, and many other leading academic and medical institutions around the world.

TASER CAM™ is an option for use with any TASER® X26™. It does not change any of the existing functions of the TASER device. The TASER CAM with its microphone and sensitive camera, adds to the X26 the ability to record audio and video, even in low-light environments. It is also rechargeable. The TASER CAM comes with free data management on EVIDENCE.COM™, online deployment records, audio/video files, and stores them in a searchable library.

TASER® X26™

TASER® X26™ BENEFITS

- 
■ NEURO MUSCULAR INCAPACITATION (NMI)
 The key technology to disable even the most aggressive subjects. NMI temporarily overrides the command rate control systems of the body to impair muscular control.
- 
■ SHAPED PULSE™ TECHNOLOGY
 A sophisticated pulse wave that utilizes a high voltage leading edge to penetrate barriers such as clothing, followed by a lower voltage stimulus pulse to cause NMI.
- 
■ ADVANCED USB DATAPORT
 Desktop technology captures time, date, burst duration, unit temperature, and DPM energy outputs. Free data management with EVIDENCE.COM™ allows data downloading and storage.
- 
■ ANTI-FELON IDENTIFICATION (AFID)
 A system to deter misuse through enhanced accountability. AFID includes bar-coded serialization of each cartridge and disperses cartridge ID tags upon activation.
- 
■ CENTRAL INFORMATION DISPLAY
 A 2-digit LED displays remaining DPM energy percentage, burst time, unit temperature, illumination status, and time and date.
- 
■ TASER CARTRIDGE
 A rechargeable module with ranges up to 35 feet (10.9 meters). Integrates a nitrogen propulsion system, high voltage insulated TASER wire, bi-metal probes, and AFID serialization.

TASER® CAM™

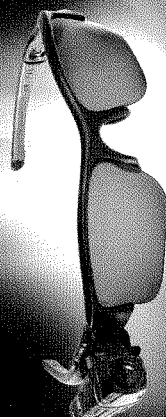

TASER® CAM™ BENEFITS

- 
■ RECORDS IN MPEG-4 VIDEO
 Records approximately 1.5 hours of audio and MPEG-4 video (black & white) at 10 frames per second in QVGA format (320 x 240).
- 
■ RECORD IN DARKNESS
 Built-in infra-red illumination source for low light and zero light video recording capability.
- 
■ AUTO-RECORD
 Auto-record mode activates when the Safety Switch is moved to the up (ARMED) position. During the first second of video the device serial number, date and time are recorded and continues to flash every ten seconds.
- 
■ USB DOWNLOAD/RECHARGE
 This comes complete with USB download cable, download software, and wall charger. TASER® X26™ deployment records can also be downloaded and stored using the free data management on EVIDENCE.COM™.
- 
■ STORAGE BAY
 One spare TASER cartridge can be clipped onto the bottom of the TASER CAM to provide additional on-device cartridge storage capability.
- 
■ VISUAL WARNING
 Central Information Display (CID) provides a warning if the camera lens is blocked. If the camera lens is blocked, the CID and the laser on the X26 will flash to indicate that the camera lens is blocked.

AXON **flex**

HD CAM

LIFE
STREAM

STREAM LIFE - ANYTIME, ANYWHERE! - WHEN REQUIRED.

BENEFITS OF AXON FLEX

Protect yourself from false complaints and avoid frivolous lawsuits. Protect taxpayer dollars by reducing these complaints and lawsuits. Get the truth by accurately capturing video from the officer's perspective. Increase community transparency and strengthen public trust. Reduce negative behavior during public interactions.

TASER[®] X2[™] Compact

Immediate Backup Shot In A Small Compact Size

Because Two Shots Are Better Than One

HIGH PERFORMANCE

■ DUAL LASERS

Takes the guess work out of aiming.

■ CROSS-CONNECT

Provides 6 different target configurations in case of a missed shot.

■ PERFORMANCE POWER MAGAZINE

Provides more than 500 frings.

■ WEATHER PROOF

Greater resistance to rain, humidity, and other elements.

■ SELF DIAGNOSTICS

Tells you if the device is healthy or has a problem.

■ BACKUP SHOT

Recover from missed shots or engage multiple targets.

■ WARNING ARC

Helps prevent contact from escalating.

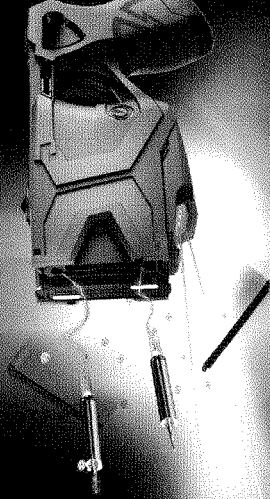

■ CURRENT METERING

Measures and accurately delivers the precise amount of current.

MORE EFFECTIVE

TASER[®] X2[™] Compact
